

# Digital Pedagogy: Approaches to teaching digital content.

**From AERI 2011**

**Chair: Ross Harvey (Simmons College)**

**Presenters: Steve Cohen (University of Michigan), Pat Galloway (University of Texas), Cal Lee (University of North Carolina), Goran Samuelsson (Mid Sweden University), Terry Plum (Simmons College), Helen Tibbo (University of North Carolina).**

**Monday, July 11 at 1:30-3:00, 3:30-5:00**

This workshop introduces participants to a range of pedagogical methods for teaching digital content. Presenters will discuss a range of approaches, including digital curriculum laboratories as class components, and the teaching of digital curation. Participants will be invited to contribute their thoughts about how they might advance digital pedagogy within their current environments or places where they hope to be employed in the future. We are hoping for an energetic discussion that critiques what has been presented, raises new ideas, voices concerns, comments on what's not being taught and needs to be, and offers other relevant comment.

Please come prepared to discuss and debate!
